COURSE TITLE:

SLIPS, TRIPS AND FALLS AWARENESS

MODULE	MODULE NAME	OBJECTIVE
1	Introduction	To understand what slips, trips and falls are, who may be at risk, their potential consequences, and the shared responsibilities for preventing these incidents.
2	Slips, Trips and the Law	To understand the main legislation relating to slips and trips, including employer duties, risk assessment requirements, workplace safety, and RIDDOR reporting
3	Causes of Slips, Trips and Falls	To understand common causes of slips, trips and falls, including wet floors, unsuitable footwear, uneven surfaces, obstacles, poor lighting, stairs, ladders, and working at height.
4	Risk Assessment	To understand how to identify hazards, assess who may be harmed, evaluate risks, select appropriate controls, record findings, and review assessments when circumstances change.
5	Preventing Slips and Trips	To understand how effective management, contamination control, good housekeeping, hazard reporting, and safer workplace design can prevent slips and trips.
6	Preventing Falls	To understand how individual fall risks, safe movement, appropriate footwear, walking aids, working at height, and suitable access equipment can help prevent falls.
7	Falls Response and Emergency Action	To understand how to respond safely following a fall, including checking the environment, assessing responsiveness and injuries, seeking assistance, and avoiding unnecessary movement.
8	Reporting and Recording	To understand how to accurately report and record slips, trips and falls, recognise when RIDDOR may apply, and use incident information to improve future safety measures.
