

COURSE TITLE:

FIRE SAFETY AWARENESS

MODULE	MODULE NAME	OBJECTIVE
1	Introduction to Fire Safety Awareness	To understand the importance of fire safety, fire classifications, and basic measures used to prevent fire incidents.
2	Causes of Fire	To understand the common causes of fire, including arson, electricity, smoking, and cooking-related risks, and how they can be prevented.
3	Fire Spread	To understand how fire spreads through direct burning, conduction, convection, and radiation, and why controlling fire spread is important.
4	Fire Safety Legislation and Responsibilities	To understand key fire safety legislation, the responsibilities of employers and employees, and the importance of maintaining safe premises.
5	Fire Risk Assessment	To understand the process of identifying fire hazards, assessing risks, implementing control measures, and reviewing fire safety arrangements.
6	Fire Safety Features	To understand fire prevention and protection measures, including fire safety features, detection systems, alarms, emergency lighting, sprinklers, and fire safety notices.
7	Fire Extinguishers	To understand different types of fire extinguishers, their suitable uses, safe operation methods, and when they should or should not be used.
8	What to Do in Case of Fire	To understand the correct actions during a fire emergency, including raising the alarm, evacuation procedures, and supporting people at risk.
9	First Aid for Burn Injuries	To understand basic first aid procedures for burn injuries and learn the correct actions to take if a person catches fire.
