

COURSE TITLE:

COSHH AWARENESS

MODULE	MODULE NAME	OBJECTIVE
1	Understanding COSHH	To understand what COSHH means, the types of hazardous substances covered, & the responsibilities of employers and employees for controlling exposure.
2	COSHH Legislation	To understand the key legislation relating to hazardous substances, including COSHH, CLP, and REACH, & how these laws support workplace safety.
3	Hazardous Substances and Risk Perception	To understand different types of hazardous substances, routes of exposure, health effects, and the importance of recognising risks associated with workplace activities.
4	COSHH Symbols	To understand the main COSHH hazard pictograms, what each symbol represents, and how hazard labels and safety information support safe handling.
5	COSHH Risk Assessment	To understand COSHH risk assessment, including identifying hazards, assessing exposure, selecting control measures, reviewing risks, and providing appropriate information and training.
6	COSHH Safety Data Sheets	To understand the purpose & contents of Safety Data Sheets & how they provide information about hazards, handling, storage, PPE, & emergency procedures.
7	Personal Protective Equipment	To understand the role of PPE in controlling exposure to hazardous substances, including its selection, correct use, maintenance, storage, & replacement.
8	Safe Handling, Storage & Disposal	To understand safe methods for handling, storing, and disposing of hazardous substances and contaminated materials in accordance with workplace procedures and COSHH requirements.
9	Accidents, Incidents and Emergencies	To understand how to prepare for and respond to accidents, incidents and emergencies involving hazardous substances in the workplace.
